EDUCATION

University of Cambridge

Magdalene College

BEng, MEng, Information Engineering

2013 – 2017

- 1st Class for Master's Thesis
- Award: Magdalene College Prize for Engineering
- Award: Singapore Institute of Technology Scholarship

Tonbridge School

Parkside House

Triple Mathematics(A*A*A*), Physics(A*), Chemistry(A) 2011 – 2013

- HMC scholarship of excellence (more than £100k in tuition fees)
- Award: Mathematics Scholarship - BMO Gold medallist

CORE SKILLS

- 🔗 Clojure · Java · Kotlin · Python
Spring Boot · Ktor · FastAPI
- 🗄️ Postgres · XTDB · Kafka
AWS S3 · SQS · SNS
- ☸️ AWS ECS · Lambdas · Kubernetes
Docker · Tilt · Helm · Grafana
Prometheus · Loki · Tempo
- ▲ Agile · GitHub · Jira · OpsGenie

PROFESSIONAL ACHIEVEMENTS

Nyaya - fintech, ESG investments

London, UK

Software Engineer - Clojure

2023 – present

- Led the successful delivery of Nyaya's 2024 flagship client release, managing a team of 3 senior engineers and gathering stakeholder requirements
- Built an asynchronous data pipeline powering multiple algorithms, boosting throughput and enabling high-performance analytics at scale
- Achieved 10× faster system recovery by migrating the core data storage from XTDB to Postgres
- Boosted local development speed by building a streamlined Tilt + Kubernetes microservices environment
- Halved pull request duration by re-architecting a major service using Domain Driven Design

Teya - fintech, payments unicorn

London, UK

Software Engineer - Java, Kotlin

2020 – 2023

- Built a Banking Service from concept to launch, projected to become Teya's second-highest revenue stream
- Drove the integration of observability best practices (logging, tracing, dashboards) into development and deployment workflows, enabling early incident detection and prevention
- Championed Kotlin adoption across 50+ engineers by building an open-source skeleton project, still used company-wide to bootstrap projects
- Improved the team efficiency by defining the developer onboarding process and mentoring new joiners
- Introduced transactional support in our Ktor service which halved the number of data integrity errors
- Built a Java-based Financial Auditing system that reduced payment errors by 90%
- Enhanced company-wide API standardisation by working with leaders to define API best practices

Teya - fintech, payments unicorn

London, UK

Data Lead - Python

2020 (6 months)

- Architected and built a proof-of-concept Python ML deployment pipeline that eliminated the company's liquidity issues through payments forecasting
- Spearheaded a multi-million investment effort into a fraud detection company by analysing and operationalising their state-of-the-art machine learning algorithms

Cambridge Consultants - consulting, engineering research

Cambridge, UK

Senior Electronics Engineer - Python, Verilog

2017 – 2020

- Secured a multimillion-pound Internet of Things consulting project by leading a team of 9 engineers
- Developed state-of-the-art mathematical models that led to the discovery of unprecedented spatial sensing technology
- Designed, prototyped, programmed, and ran user tests for novel IoT devices using Python
